

WHAT IS CLAIMED IS:

1. A gaming machine comprising:

a gaming board having at least one winning hole whereby a prescribed number of balls is paid out as the ball falls into the winning hole; and

a display unit which displays images of a variable display game, a single game of which starts out with a plurality of symbols being displayed variably and ends with the stopping of the variable display of a plurality of symbols; wherein,

the display unit is disposed on a reverse face of the gaming board and at least a part of the gaming board behind which the display unit is disposed has transparency.

2. A gaming machine according to claim 1, wherein the display unit is disposed on an entirety of the reverse face of the gaming board which has transparency.

3. A gaming machine according to claim 1, wherein the gaming board has a transmittance rate of 30% or more.

4. A gaming machine according to claim 1, wherein the gaming board has a transmittance rate of 50% or more.

5. A gaming machine according to claim 1, wherein the part of the gaming board behind which the display unit is disposed comprises an acrylic resin.

6. A gaming machine according to claim 1, wherein the part of the gaming board behind which the display unit is disposed has a peg.

7. A gaming machine according to claim 1, wherein a plurality of the display units are disposed.
